

## Honeycomb Bonded Sheet

**Total Packaging Solutions**  
*'Define, Develop, Deliver...Improve'*

**'Strong as a Rock, Light as a Feather'**

Honeycomb Sheet is another premium product that is rigid and lightweight that is available in panel thicknesses of 3mm, 5mm and 10mm and in a wide range of sizes and weights per m<sup>2</sup>. The standard panel size is 2400mm x 2100mm; the standard colour is grey and special properties feature UV and Fire Resistance and special colours that can be supplied along with a wide variety of laminate and textured finishes.

We can define our customer needs and develop a handling material solution using Honeycomb sheet which will maximise efficiency and at the same time reduce costs as well as being fit for purpose. The extruded sheets are very cost effective and are alternatives to the more traditional, heavier materials such as plywood.
